

Installation of Oracle Developer6i

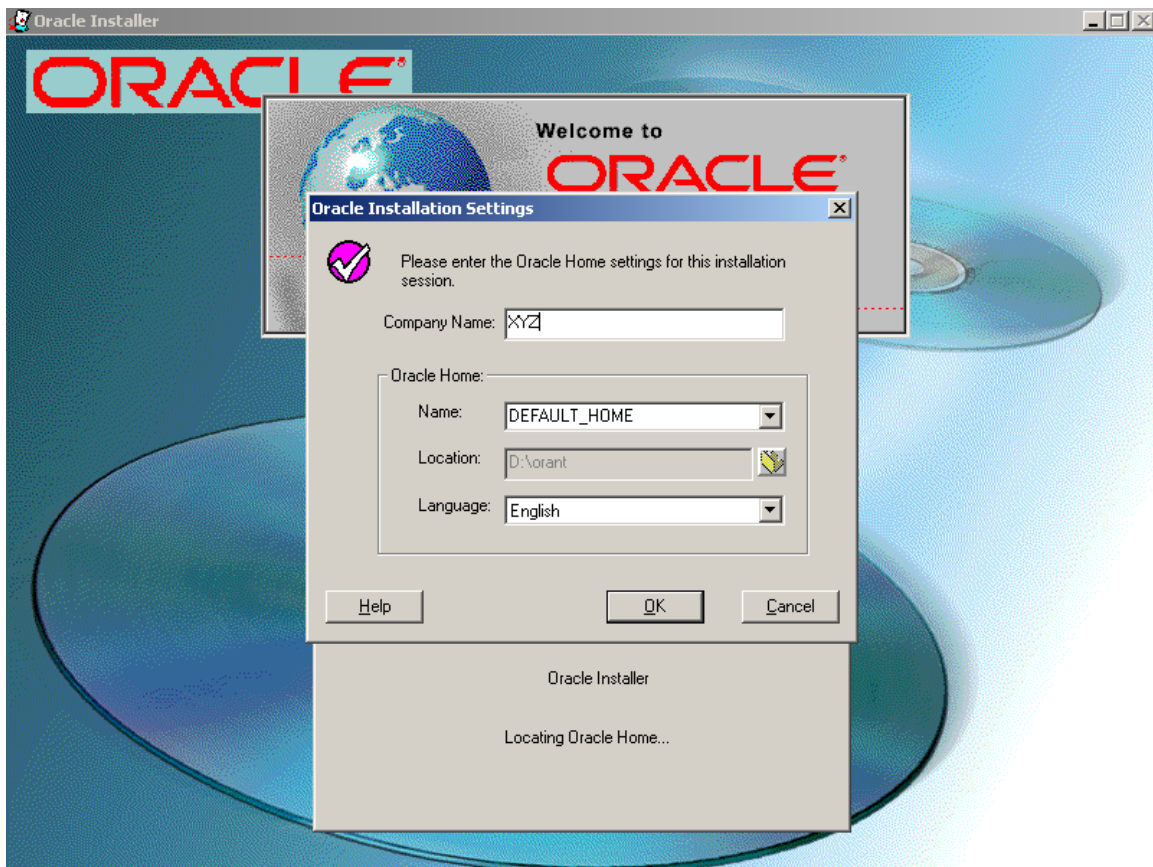

Before you Install Oracle Developer6i

Perform the following tasks before installing Oracle components:

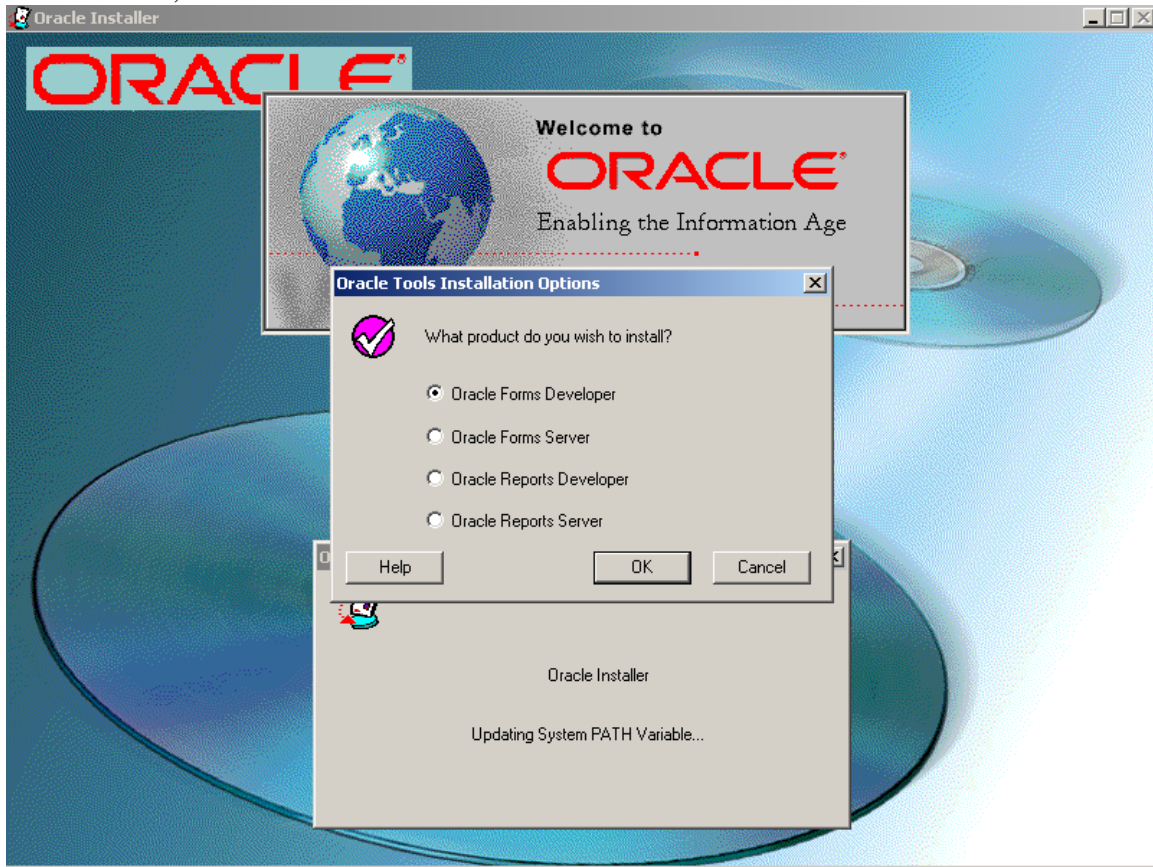

1. Log on as a member of the Administrators group to the computer on which to install Oracle components.
2. Continue to the "Beginning Your Oracle Developer6i Installation" section.

Beginning Your Oracle Developer6i Installation

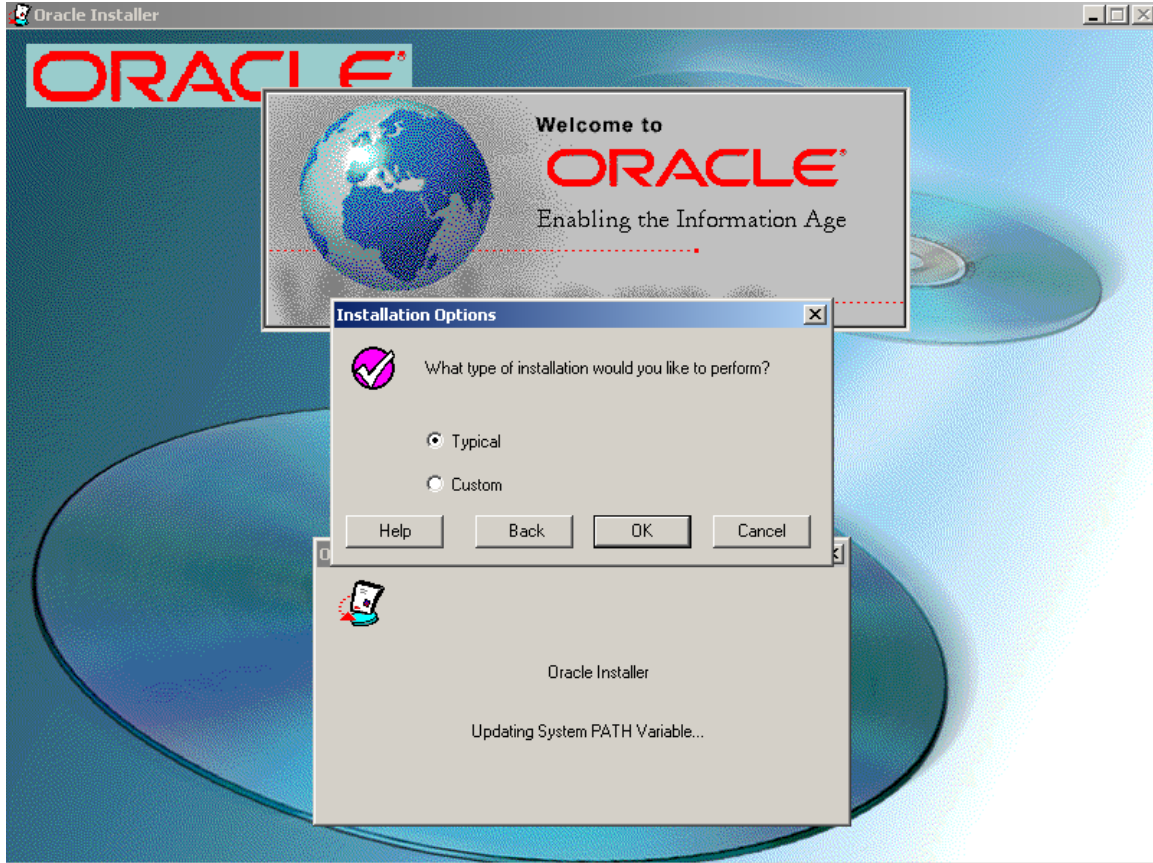

1. Go to the source directory (e.g. [\\Erp/DEVELOPER/d2k_6i](http://Erp/DEVELOPER/d2k_6i) or the directory where you have setup.exe file) and double click setup.exe file. You will see the following screen.

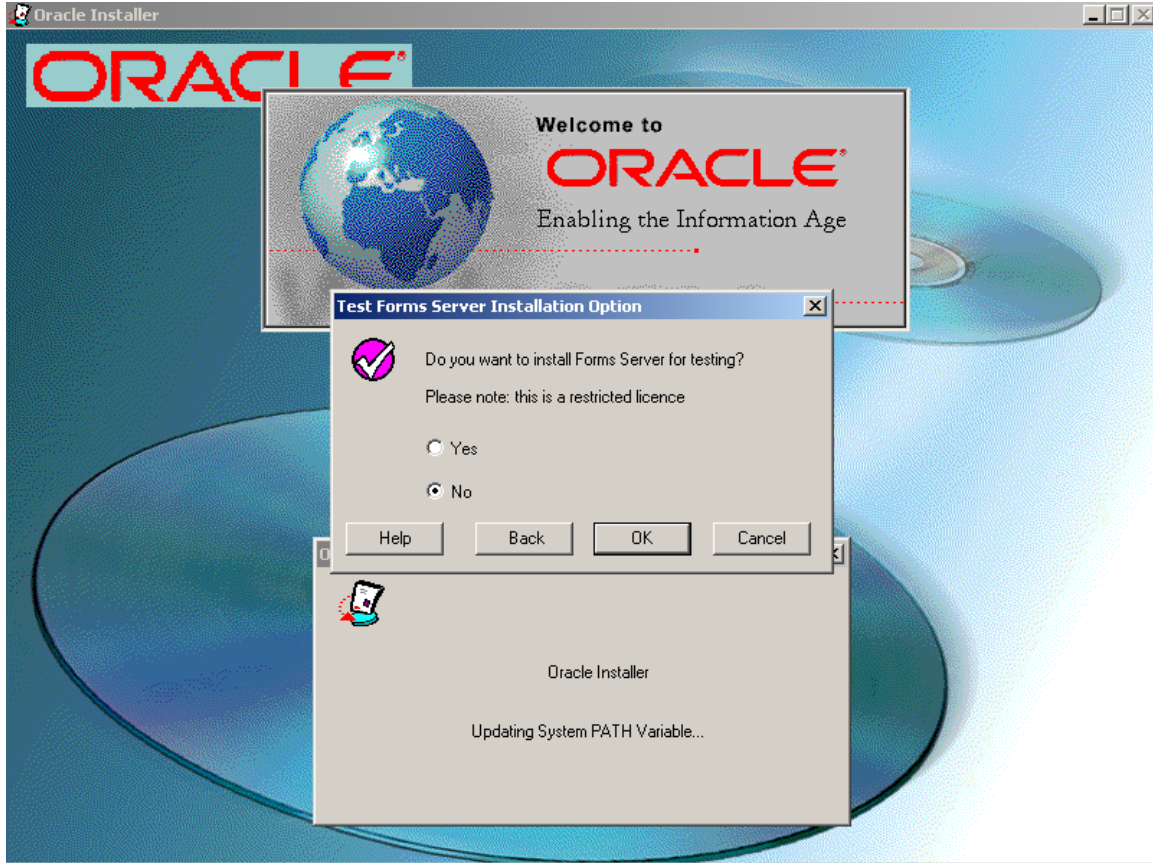

2. Enter your company name and if you want to change the location, first change the oracle home name and press OK button. You will be asked for the product to install, which is shown in the next screen.

3. Choose “Oracle Forms Developer” option and press OK button. The following screen will be shown.

4. Select the type of installation “Typical” and press OK button. You will be asked for the installation of forms server in the next screen.

5. Select “No” and press OK button.

6. You will be asked for shut down some windows services. Press “Yes” button.
Now the installation gets started.

7. Wait for few minutes to complete the installation process. You will see a message “Installation Completed Successfully”. Press OK button.

Note: If the installation of “Oracle Forms Developer” is completed successfully, repeat the steps from 1 to 7, but this time select “Oracle Reports Developer” in step 2.

8. The installation of “Oracle Forms Developer” & “Oracle Reports Developer” completed successfully.
