Installation of Newton ERP

Note: Before install Newton ERP make sure that "Oracle Forms Developer" & "Oracle Reports Developer" is successfully installed on your computer. The installation of these products is described in the file "OracleDeveloper6iDoc".

To install powerful Newton ERP follow the following Steps:

1. **Map the Z:\ drive:**
   (i)   To map the Z:\ drive right click on "My Computer" then click "Map Network Drive…". A window will be popped up asking for Drive and Location.
   (ii)   Select the drive letter Z and enter the location (where the files of Newton ERP are stored. e.g. \\ERP\angel_erp). Press the Finish button.

2. **Setting the Host String:**
   (i)   Go to the folder where you have installed oracle products in your computer. e.g. D:\Orant\net80\admin. Open the file tnsnames.ora in notepad. In this file you will see a block like:

   ```
   Tcp-loopback.world =
     (DESCRIPTION =
       (ADDRESS_LIST =
         (ADDRESS =
           (COMMUNITY = tcp.world)
           (PROTOCOL = TCP)
           (Host = 127.0.0.1)
           (Port = 1521)
         )
       )
       (CONNECT_DATA = (SID = ORCL)
       )
     )
   ```

   (ii)   Copy the whole block and append it at the end of file.
   (iii)   Make the following changes in the appended block

   ```
   Angel =
     (DESCRIPTION =
       (ADDRESS_LIST =
         (ADDRESS =
           (COMMUNITY = tcp.world)
           (PROTOCOL = TCP)
           (Host = 192.168.0.3)
           (Port = 1521)
         )
       )
       (CONNECT_DATA = (SID = ANGEL)
       )
     )
   ```

Note: The above changes are based on an example. The actual changes may be different depending on the IP address, SID & host string of the database server.

3. **Setting the Registry Environment Variables:**
   (i)   Open the registry editor by clicking Start →Run from start menu. Type Regedit and press OK button.
   (ii)   Go to HKEY_LOCAL_MACHINE → Software →Oracle.
   (iii) Create a new string value by clicking right mouse button.
   (iv)   Rename it as UI_ICON.
   (v)   Modify the value data as Z:\ Newton\Icon.
   (vi)   Modify the value data of given string value FORMS60_PATH as Z:\Newton\Lib.
   (vii) Close the registry editor.
4. **Creating The Desktop Icon:**
   (i)   Go to folder Z:\Newton\main folder. Paste a shortcut of file Newton.fmx on Desktop.
   (ii)   Open the property of the shortcut and change the target as D:\ORANT\BIN\ifrun60.exe Z:\Newton\Main\Newton.fmx. There must be a space between two paths. The first path may be different depending on the installation directory of oracle products on your computer. In the second path the file name may be Newton.fmx or Newton1.fmx depending on the latest version running in the organization.

!!!Wishing You A Very Good Time With Newton ERP.
